Sustainment & Accountability

The 924 MOS is one of the most crucial to the Army. As a 924 Unit Supply Specialist the Quartermaster Culture of Accountability and Sustainment is displayed daily. We as an Instructor must teach basics of accountability to the new 924 so they can transfer those skills to the Operational Army. As a ~~Team~~ Instructor we will teach ~~Individual~~ ~~Team~~ accountability, Supervisory accountability and Unit Level ~~Responsibilities~~.

The first type of ~~responsibility~~ accountability is Individual ~~and~~ accountability. As Instructors we see this daily in our classrooms for example we put Soldiers on Break and if they come back late on a regular basis. We can ~~not~~ ~~use~~ use TRADOC Regulation 350-6 for corrective Action such ~~as~~ as certain exercises they may perform to correct the lateness issue. Discipline is an important part of Micro of the QM culture of Accountability. As a 924 Soldiers must always have good discipline ~~and~~ and account for the CDR's property. Micro is the building block for a Soldier and it

Should start out on a positive note.

The next level of ~~accountability~~ accountability a 92Y will need is MACRO or Supervisory accountability. As a 92Y from a PFC to ~~SSG~~ SSG the Soldier could be in charge of the Commander's property so this is critical. So as Instructors we must ensure we ~~do~~ do our best to have all of our Soldiers ready for the fight. And a real unit with regulations such as FM 4.0 Sustainment Principles. As a 92Y most important one is anticipation we must always try and know what our unit needs and wants so they are combat ready. The 92Y in MACRO level of the QM culture of Accountability must also ensure the company has proper Command Supply Discipline Program in place for his or her Commander. As the Supply led for the company this shows the ~~entire~~ entire company how important the Commander places on property accountability. ~~This~~ This will allow for the 92Y to ~~be successful~~ succeed.

Then Next level of Qm accountability that is taught Deals with Unit level accountability. However this level very complex and as a 924 must be used to help them be successful. One part of ~~the~~ this is the Meso ~~sys~~ system. As a 924 in the field they must always be trained and always up to date on relevant ~~&~~ training. As a 924 ~~Instructor~~

Instructor we must ensure we produce the best and brightest 924's. The unit's cannot have Soldiers that are learning tasks that are not relevant or outdated. So therefore the Meso system we as Instructors must know trends and what units are looking for from new 924's. If new changes to the course are required the chief Instructor must contact Trained Development. In LTO we have had Slight visits from for example ~~the~~ operational units to our ~~train~~ training Department to observe training and we can get feedback from them on what skills they need from our 924's.

The other area of Unit level that is important is the Mega environment, as a 92Y a unit will deploy and of course go to war as this is the Army's purpose. So we as Instructors must prepare the 92Y to use all information available to him or her. ~~esp~~ When a unit prepares for deployment there is lots of PB changes and lots of work for a 92Y so this is a 92Y's superbowl if you will. They will look good or worry the commander. My goal is to help the 92Y's have the skills required to perform the ~~split~~ ~~the~~ OPB split without issue and give the CDR a good feeling about ~~a~~ that 92Y. I always tell my Soldiers once you get out to the field and you need ~~assistance~~ help I am on Global email me; I am on Teams find me. I can assist you if you don't have anyone else to help. But all of this goes back to first one micro is that 92Y dedicated

to do ~~the~~ ask ~~for~~ help or
get help if they need it. Individual
accountability or Micro Accountability
of the 92Y really determines the
overall success or failure of a
unit supply room. As a 92Y Instructor
we ensure instill discipline but that
soldier must show it once they
go into the operational army.

As a 92Y Instructor the
Army culture of ~~Accountability~~ accountability is
very important. As seen the Micro
or Individual is the vital to a
Unit's Success. Without a
motivated soldier ~~either~~ willing to be
a successful 92Y to get the 92Y
credentials to better their craft to
ask for help when a deployment
is going the unit may fail. The
Unit Supportist position in the Army
is ~~the~~ the best and most
rewarding ones in the Army.
Therefore our 92Y's ~~should~~
should be the best and as an
Instructor we should only produce
the best soldiers in the Army.
