Dining Facility Account Management

- **Review Areas:**
  - Earnings and Expenditures Record (Account Card).
  - Basic Daily Food Allowance (BDFA).
  - Account Status Report.
  - Account Tolerance Percentages.
Dining Facility Account Management

Abbreviations

- BDFA – Basic Daily Food Allowance.
- IAMA – Inventory Adjustment Monetary Account.
- HC – Headcount.
- LPRCT – Local Purchase Receipt.
- SRCT – STORES Receipt.
- STORES – Subsistence Total Order and Receipt Electronic System.
- DXD/DXF/DXT – Dining Facility to Dining Facility /to Field/ to TISA transfer.
- ISS – ISSUE (from SSMO).
- SSM – Subsistence Supply Manager.
- SSMO Subsistence Supply Management Office.

Page 1 of 1
Basic Daily Food Allowance

- BDFA is calculated based on a market basket of items true to a specific region. An additional percentage is added for the price of condiments and local market items such as bread, dairy and soda.

- Items in the market basket includes meats, grains, vegetables, sweets etc.

- Regulation dictates the percentage used to calculate the credit received for each meal.
Dining Facility Account Management

Basic Daily Food Allowance

- The BDFA is the dollar value authorized to feed each SIK soldier and other diners for three meals a day. The BDFA is used to determine dining facility earnings. The meal conversion percentages and procedures for determining dining facility earnings are in DA Pam 30-22, paragraph 3-43.

- ACES computes the dollar value of the BDFA and provides it to the supporting installation FPMO in accordance with AR-30-22 paragraph 5-13.

- The BDFA is computed by ACES (ATSM-CES-OC) monthly for each CONUS and OCONUS region.

- ACES will determine the BDFA for each region. Price changes experienced during a given month will not affect the BDFA until the next end of month computation.

- An additional 25 percent of the total BDFA is authorized for the traditional Thanksgiving, Christmas, and Army birthday celebration meals. The additional allowance will be applied to the holiday lunch meal regardless of the time of day it is served. For an example of holiday meal computation, see DA Pam 30-22, paragraph 3-43.
Basic Daily Food Allowance

- The BDFA is allocated into three categories to represent the dollar value of the daily meals provided, 20 percent for the breakfast meal, and 40 percent each for the lunch and dinner meals. Use the 5-mil rule to round meal values to dollars and cents.

- The BDFA is allocated into two categories when the dining facility is authorized to serve brunch and supper meals on the weekend. The brunch meal is allocated 45 percent of the BDFA, and the supper meal is allocated 55 percent of the BDFA.
Dining Facility Account Management

Basic Daily Food Allowance

- Example of each meal calculations for account reimbursement are as follows:

  BDFA = $8.35.
  $8.35 \times 20\% = $1.67 \text{ Breakfast entitlement.}
  $8.35 \times 40\% = $3.34 \text{ Lunch and Dinner entitlement.}
  $8.35 \times 45\% = $3.76 \text{ Brunch entitlement.}
  $8.35 \times 55\% = $4.59 \text{ Supper entitlement.}
  $8.35 \times 25\% = $2.09 + $3.34 = $5.43 \text{ Holiday meal entitlement.}

- Each meal entitlement multiplied by the headcount for that meal equals the earnings for that meal i.e. lunch headcount is 325, lunch meal entitlement is $3.34. Take $3.34 \times 325 = $1085.50 earned for that meal.
Dining Facility Account Management

Account Status Report

• Beginning Inventory: $13,000.00
type: Book/Accountable
• Purchases: $11,000.00
• Total Available: $24,000.00
• Ending Inventory: $8,360.00
type: accountable/physical

Subtract total inventory available from the amount of the last physical inventory to calculate the dollar amount that has been spent up to the current date of the report.

$24,000.00 - $8,360.00 = $15,460.00

• Actual Expenses: $15,460.00
this figure is your current total expenditures.

• Earnings: $14,769.00
Subtract earnings from expenses to reveal current account status.

$14,769.00 - $15,460.00 = $691.00 OVERSPENT.
Dining Facility Account Management

Account Status Requirement

• Due to menu selection/variety and headcount fluctuations, the dining facility may be overspent or underspent at the conclusion of an accounting period. This is authorized.

• The primary requirement of the dining facility is to conclude the FY at zero or underspent in the year-to-date status.

• A dining facility that does not conclude the FY at zero or underspent may be required to complete a FLIPL. The responsible food advisor should monitor the year-to-date dining facility status as part of the quarterly action plan and provide the data to the commander.
Dining Facility Account Management

Account Allowable Tolerance

• Any dining facility that exceeds the established year-to-date (Monthly) management factor of a plus 3 percent overspent, or an underspent factor of a minus 10 percent will require an analysis and validation by the responsible food advisor. The analysis and validation are to determine the reason(s) the facility has exceeded the established management factors.

• Within 7 business days of the conclusion of the accounting period, the responsible food advisor will validate the dining facility operational procedures.

• A record of remedial actions to be taken by the FOS will be developed by the FOS and the responsible food advisor. The purpose of this measure is not punitive, but to ensure that the dining facility can operate with maximum flexibility while remaining within prescribed monetary standards.

• The responsible food advisor will continue to monitor the dining facility operation until the year-to-date dining facility status is at an underspent status.
Dining Facility Account Management

Calculating Account Tolerance Percentage

- **Monthly** – 3% overspent or 10% (underspent).

- Last month’s ending account status: +$691.00

- Divided by last month’s earnings: $14,769.00

- Equals – 0.0467 X 100 = 4.6% overspent (adjust by 5-mil rule) makes this account 5% overspent.
  
  2% above the allowable tolerance.

- This account will require analysis and validation by the responsible Food Advisor or the Installation Food Program Manager.
The Inventory Adjustment Monetary Account (IAMA) Report process is used to assist managers with inventory cost based on price changes during the accounting period.

It provides visibility of items with a current balance on hand that had price changes.

The TIIN, Item Name, the day the price change took effect, Unit of Issue (UI) the quantity (QTY), New Price, Old Price, Price Change, the Difference, and the Accounting Period Total.

When there are price changes that impact the inventory the transactions appear on the dining facility Earnings and Expenditure Record.

The description IAMA is used on these reports to identify price changes. The entry on the dining facility is a memo entry only. Its intent is to give management in the dining facility visibility of price changes that affect current inventory.
